

# Colony Medical Care

## PARASITES

Supplies we recommend:

[Droncit for tapeworms](#)

[Capstar for fleas](#)

[Pyrantel \(strongid\) for other worms](#)

[Saline ampules for cleaning eyes and noses](#)

[Drontal for tapeworms and roundworms](#)

[Barn Cat Lady](#) has an extensive article on parasite control. If you are considering using diatomaceous earth for flea control read the section on that topic. Very informative.

For worming, (either pyrantel or fenbendazole) mix in milk replacer. Here is a [video with instructions](#) from Revival.

[Nematodes](#) are microscopic organisms that can be used in colony areas. They eat flea larvae.

[Alley Cat Allies](#) on parasite control.

## OTHER RESOURCES

Another source of medical supplies [Revival Animal Health](#)

[FieldHaven's Kitten Sitter](#) page has much more information on caring for kittens. We highly recommend the [Kitten Lady](#) videos.
